4 · Luxury silk hijabs	7 mulberry silk & satin styles
5 · Bridal hijabs	10 embellished bridal styles
Size, care, private label & ordering	Dimensions, packaging, process and contacts

Quality checks on every order

- Fabric batches verified for weight (GSM), composition and colourfastness before cutting
- In-line inspection during cutting and stitching
- Pre-final inspection before packing
- Randomised final audit before release
- Seam strength, tear resistance and dimensional-stability testing
- Third-party pre-shipment inspection on request

How to read the prices

MINIMUM ORDER (MOQ)
25 pieces per pattern per colour

SAMPLE CHARGES
₹3,000 flat per sample

Indicative pricing. Prices in this catalogue are approximate wholesale ranges for planning and comparison. They are ex-factory Mumbai, per piece, for plain stock colours from the MOQ of 25 pieces per pattern per colour, excluding GST, freight, duties and optional branding. Your final price is confirmed in a written quotation (within one business day) once fabric, GSM, size, colours, quantity and packaging are fixed.

Volume pricing

ORDER PER STYLE	PRICE LEVEL
25 (MOQ) – 999 pcs	List range shown in tables
1,000 – 2,999 pcs	approx. 5 – 7% below list
3,000 – 9,999 pcs	approx. 9 – 11% below list (shown as "3,000+")
10,000+ pcs	approx. 12 – 15% below list, quoted per programme

Reading the GSM tables

- **GSM** (grams per square metre) is fabric weight. Higher GSM means more opacity, a heavier drape and a higher price.
- The row marked **standard** is the weight we stock and recommend for that style.
- Silk is graded in **momme (mm)**. 1 momme ≈ 4.3 GSM, so 19 mm ≈ 82 GSM.
- Hijab prices are quoted at 75×190 cm. Allow about –7% for 70×180 cm and +12% for 80×200 cm. Silk squares are priced at 90×90 cm.
- USD figures are converted at ₹88 = US$1 and follow the exchange rate on the quotation date.

Branding & one-time costs

Woven brand label	₹2 – ₹5 / pc
Printed care / size label	₹1 – ₹3 / pc
Printed hang tag with string	₹3 – ₹8 / pc
Individual poly bag with logo	₹2 – ₹4 / pc
Branded retail card / sleeve (hijabs)	₹8 – ₹15 / pc
Rigid gift box (luxury / bridal)	₹60 – ₹150 / pc
Custom Pantone lab-dip	₹1,500 – ₹3,000 per colour (one-time)
Print strike-off	₹2,500 – ₹5,000 per design (one-time)
Sample charges (any style)	₹3,000 flat per sample

Shipping terms

- EXW, FOB, CIF and DDP supported. Most accounts buy **FOB Mumbai (Nhava Sheva / JNPT)**.
- Air freight, sea freight (FCL / LCL) or express courier.
- Exports are zero-rated for GST. Domestic orders are billed with GST at the prevailing apparel slab.
- Commercial invoice, packing list and certificate of origin are prepared for every shipment.

Hijab fabric & GSM guide

Chiffon

60 – 90 GSM

We developed our chiffon specifically for headscarves, balancing sheerness against enough opacity that most customers can wear it without an underscarf underneath. It comes in matte and satin-finish variants, and it's the base fabric behind our best-selling hijab styles.

Soft drape · Available matte or satin · Breathable · Consistent dye uptake

Georgette & Crinkle

70 – 120 GSM

Georgette's crinkle texture gives movement and volume without adding weight, and that's largely why georgette hijab styles stay one of our steadier reorders — along with occasion abayas that need visible motion in product photography.

Crinkled texture · Lightweight · Good movement and flow · Semi-sheer to opaque range

Crepe

95 – 130 GSM

Crepe is our most versatile occasion fabric, and we use it across khimars and embellished crepe abayas. The slightly textured surface diffuses light attractively, which is part of why it's a preferred base for embroidery and stonework.

Textured matte finish · Holds embellishment well · Good structure · Available satin-back

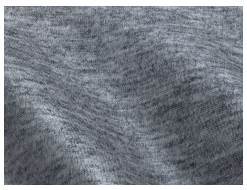

Jersey

160 – 220 GSM

Jersey and modal give the stretch and recovery behind our no-pin, wrap-and-go styles and casual modest wear. We produce both solid and heathered finishes, and we tune the stretch percentage specifically for hijab applications rather than borrowing it from generic apparel jersey.

Four-way stretch · Breathable · Wrinkle-resistant · No-pin wearability

Modal

140 – 180 GSM

Beechwood-derived modal blended with cotton for a silkier, matte hand-feel than jersey, with richer, more even dye uptake.

Four-way stretch · Matte, low sheen · Even dye uptake · No-pin wear

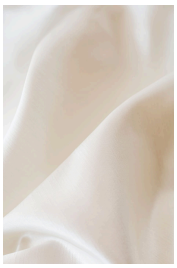

Cotton Voile

60 – 100 GSM

We use cotton across our inner cap, underscarf, and lightweight hijab lines, wherever breathability and skin comfort matter more than anything else. Specifically, we work with combed cotton, since it gives a smoother hand-feel than carded alternatives.

Breathable · Soft hand-feel · Absorbent · Hypoallergenic-friendly

Satin

90 – 130 GSM

Tight high-gloss satin weave with a fluid, weighted drape that keeps its glass-smooth finish through transport and retail handling.

High sheen · Weighted drape · Occasion & gifting · Holds embellishment

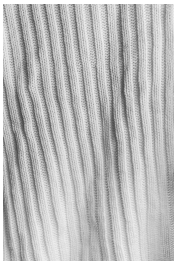

Mulberry Silk

12 – 22 momme (≈52 – 95 GSM)

We reserve mulberry silk for our luxury tier — hand-rolled hem hijabs, premium scarves, and gift-ready ranges. It carries a natural sheen and drape that synthetic fabrics just can't fully replicate, and we inspect every roll for consistency before it gets cut.

Natural sheen · Superior drape · Temperature-regulating · Hypoallergenic

Ribbed Knit

200 – 280 GSM

Vertical rib knit with more structure than plain jersey for a sculpted, pin-free wrap with a streetwear feel.

Structured stretch · No-pin · Casual / streetwear · Cool-season weight

Bamboo-Viscose

150 – 200 GSM

Bamboo-viscose jersey that feels softer and wicks moisture better than cotton jersey. Suits eco and wellness-positioned ranges.

Breathable · Moisture-wicking · Naturally soft · Eco positioning

Printed Chiffon & Modal

60 – 180 GSM

In-house digital printing heat-set into the fibre. Concept to strike-off in under two weeks, with Pantone recolouring on repeats.

Digital print · Strike-off < 2 weeks · 25 pcs per pattern per colour · Custom colourways

Performance Knit

120 – 220 GSM

Polyester or nylon with 10 – 18% spandex. Moisture-wicking, quick-dry, flatlock seams. Chlorine-resistant grades for swimwear.

Four-way stretch · Quick-dry · Flatlock seams · Chlorine resistant (swim)

GSM at a glance

Fabric weight ranges we produce for hijabs, lightest to heaviest. Woven fabrics (chiffon, georgette, satin, crepe) feel lighter than knits at the same GSM because knits stretch and drape closer.

Which GSM for which market?

MARKET / CUSTOMER	RECOMMENDED FABRIC & GSM
GCC, South Asia, hot & humid	Chiffon 75, cotton voile 60 – 80, georgette 80
UK, Europe, North America	Jersey 180 – 200, modal 160, crepe 95 – 110
Cold climates / winter range	Jersey 220, ribbed 240 – 280, silk-cashmere 120 – 150
First-time hijab wearers	Instant jersey 180, one-piece pull-on
Gifting, Eid & occasion	Satin 110 – 130, silk 16 – 19 mm, printed modal 160
Athletes, schools, swim	Performance knit 160 – 200, nylon-spandex swim 200
Bridal & nikah	Satin 110 – 130 or silk 19 mm with lace, pearl or crystal

Master GSM price matrix — Hijabs

Core Hijabs

Chiffon, jersey, modal, and Nida hijabs, finished for a drape and hand-feel that holds up whether you're ordering 25 pieces or 50,000.

Hijab is usually the first category a new wholesale buyer orders from us, and it's also where fabric choice matters more than people expect going in. We work with four fabric families here: chiffon, jersey, modal, and Nida. Each one solves a different problem for a different kind of customer, and picking one purely because it's cheaper per meter is a decision that tends to show up in your return rate a few months later.

Chiffon is our highest-volume export fabric — a 75 gsm matte weave, opaque enough to wear without an underscarf in most climates. It's what most buyers actually mean when they ask for a "standard" hijab, even if they don't use that word. Jersey and modal cover the no-pin, wrap-and-go side of things: four-way stretch, no fraying at the edges, and a softer feel that tends to do better in cooler markets than chiffon does. Nida sits at the more structured end of the range, and it's usually ordered by buyers who are already stocking our Nida abayas and want the headscarf to match.

Every hijab ships in our standard 42-shade library. Custom Pantone matching is available on request if you need something outside that range. Standard sizes are 70x180 cm, 75x190 cm, and 80x200 cm, and we can cut custom dimensions on request for markets that want something shorter or fuller.

HIJAB TYPE 01

Georgette Hijabs

Crinkle-texture georgette with visible movement and a lightweight, non-cling drape.

Model wearing a georgette hijab with visible crinkle texture and soft drape

Close-up of georgette hijab fabric showing its self-textured crinkle weave

This is usually what we point buyers toward when they want more visible texture than chiffon gives them, without adding any weight to the fabric. It's a self-crinkled polyester-viscose weave, and the fold is soft right out of the pack, no steaming needed before a customer can wear it, which also means it photographs well straight off a hanger. Because the crinkle is woven in rather than pressed on, it doesn't flatten out after a few washes the way pleated finishes tend to, and that's the complaint we hear most often about competitors' versions. Offered from 25 pieces per pattern per colour, and we'll match a specific Pantone if you need one.

MOQ
25 pieces per pattern per colour

HIJAB TYPE 02

Chiffon Hijabs

Our highest-volume export fabric — a 75 gsm matte weave opaque enough to skip an underscarf.

Model wearing a matte chiffon hijab draped with a crisp, structured fold

Close-up of matte chiffon hijab fabric showing its fine, opaque weave

When a buyer asks for a "standard" hijab without specifying fabric, this is usually what they mean, and it's the single largest line running through our factory. The 75 gsm matte weave is opaque enough to wear without an underscarf in most climates, presses flat for retail packaging, and holds a fold that jersey or modal simply can't match. We recommend it to first-time private label buyers specifically because it's the easiest fabric to print, dye, and finish consistently once you're ordering at volume. It's available across the full 42-shade library, starting at 25 pieces per pattern per colour.

HIJAB TYPE 03

Jersey Hijabs

Four-way stretch knit built for a no-pin, wrap-and-go finish.

Model wearing a stretch jersey hijab wrapped in a relaxed, no-pin style

Close-up of jersey hijab knit fabric showing its four-way stretch texture

Jersey is really about speed. It's a cotton-modal knit with four-way stretch, so customers wrap it and go, no pins, no separate underscarf cap holding anything in place. The knit doesn't fray at the cut edge, which keeps our hemming costs down compared to woven fabrics, and it holds its shape through a full day rather than sagging by afternoon the way some cheaper viscose jerseys do. Of everything in our fabric library, this is the one that reorders best with buyers targeting athleisure-adjacent customers or first-time hijab wearers. We offer it in solid and heathered finishes, from 25 pieces per pattern per colour.

HIJAB TYPE 04

Modal Hijabs

Soft modal-blend hijab with a matte, low-sheen finish and a silkier hand-feel than jersey.

Model wearing a soft modal hijab with a matte, low-sheen drape

Close-up of heathered modal fabric showing its soft, fine knit texture

Modal is a step up from standard jersey for buyers who still want that no-pin stretch but with a noticeably softer, silkier feel and less sheen. It's a beechwood-derived fiber blend that drapes closer to the body than cotton jersey without ever clinging, and it takes dye more evenly too, so colors come out richer and more consistent across a full production run. This tends to work well for premium everyday or gifting ranges, where the point is to feel different from a commodity jersey hijab rather than just look different. Offered from 25 pieces per pattern per colour, with custom blend ratios available on larger orders.

HIJAB TYPE 05

Printed Modal Hijabs

Modal's soft stretch with in-house digital print development for pattern-led ranges.

Model wearing a printed modal hijab in a botanical pattern

Close-up of a floral printed pattern on soft modal fabric

Printed modal takes our in-house print studio and puts it on the modal base, so buyers get pattern variety without giving up the fabric's soft, no-pin stretch. Digital printing holds fine floral and botanical detail better than screen printing does at this weight, and because the print is heat-set into the fiber rather than sitting on top of it, colors stay sharp wash after wash. This range tends to do best with younger, fashion-forward customers who reorder for new prints more than they reorder solids. Strike-off samples usually take under two weeks, and production starts at 25 pieces per pattern per colour.

HIJAB TYPE 06

Printed Chiffon Hijabs

Digitally printed chiffon with in-house pattern development from concept to strike-off.

Model wearing a printed chiffon hijab with a fine floral pattern

Close-up of a navy floral print on matte chiffon fabric

Printed chiffon pairs our standard fabric with custom pattern development, so private label buyers get something genuinely different from just reordering the plain chiffon line. Our print studio can take a new pattern from concept to strike-off sample in under two weeks, and the chiffon base actually holds fine line detail and color saturation better than most printed jersey out there. It's what we recommend when someone wants a signature seasonal print but doesn't want to commit to a full custom-fabric minimum. Production starts at 25 pieces per pattern per colour, and repeat orders can get Pantone-matched recoloring.

HIJAB TYPE 07

Satin Hijabs

High-sheen satin weave positioned for occasion, evening, and gifting ranges.

Model wearing a high-sheen satin hijab with a fluid, weighted drape

Close-up of ivory satin fabric showing its smooth, glossy sheen

Satin is our step-up occasion fabric: a high-gloss sheen and a fluid, weighted drape that reads as formalwear rather than a daily basic. The tighter weave keeps its pressed, glass-smooth finish through transport and retail handling in a way cheaper satin-look alternatives just don't — those tend to dull and mat after a single wash. Buyers usually stock this alongside our luxury silk for evening and bridal-adjacent gifting, where presentation matters as much as the fabric cost itself. Offered from 25 pieces per pattern per colour, and gift-box packaging is available if you want it.

130	Heavy satin	Evening / bridal-adjacent drape	₹145 – ₹185	$1.65 – $2.10	₹130 – ₹170

HIJAB TYPE 08

Silk Hijabs

Mid-tier mulberry silk with a machine-rolled hem for a genuine silk hand-feel at wholesale scale.

Model wearing a mulberry silk hijab draped elegantly with natural sheen

Close-up of silk hijab fabric showing its natural fiber sheen

This one runs on genuine mulberry silk, not a synthetic silk-look substitute, and that distinction is exactly what separates a "luxury" claim customers believe from one they don't. The natural sheen and weight give a drape no polyester blend fully replicates, and we keep the hem machine-rolled to hold unit costs workable at wholesale volume rather than hand-finishing every single edge. It sits a step below our fully hand-rolled luxury silk line, so it's the practical entry point if you want a genuine silk SKU without paying luxury-tier prices. Offered from 25 pieces per pattern per colour.

HIJAB TYPE 09

Crinkle Hijabs

Self-textured crinkle finish for volume and visible movement without added weight.

Model wearing a crinkle-texture hijab with visible self-supporting ripple

Close-up of crinkle hijab fabric showing its permanent textured surface

Crinkle uses a heat-set texturing process that locks a permanent ripple into the surface, giving real volume and movement that a flat weave just can't produce. Unlike a pressed pleat, this texture survives machine washing without needing to be re-ironed, and that's the reason retail buyers, as opposed to boutique accounts, consistently give us for reordering this finish over pleated alternatives. It pairs naturally with our georgette range if you're building out a full textured-hijab collection. Offered from 25 pieces per pattern per colour.

HIJAB TYPE 10

Cotton Hijabs

Breathable cotton voile built for hot-climate daily wear.

Model wearing a breathable cotton voile hijab folded softly

Close-up of cotton voile hijab fabric showing its light, breathable weave

Cotton voile is what buyers in hot, humid markets ask for once chiffon starts drawing complaints about heat retention. It's lightweight and genuinely breathable in a way synthetic fabric isn't, though the trade-off is a less structured drape and a bit more visible creasing after folding. It works well as a natural-fiber option for customers who specifically ask for cotton, or for a private label range building around a breathable, natural-fiber angle. Offered from 25 pieces per pattern per colour, and we pre-shrink it to cut down on size variance after the first wash.

HIJAB TYPE 11

Ribbed Hijabs

Ribbed knit texture for a structured, streetwear-adjacent finish.

Model wearing a ribbed knit hijab with a structured, sculpted wrap

Close-up of ribbed knit fabric showing its vertical rib texture

Ribbed brings a visible vertical rib knit into the hijab line, aimed more at younger customers who wear their hijab closer to streetwear styling than traditional occasion dress. The tighter rib holds more structure than standard jersey, which gives a slightly compressed, sculpted wrap without needing pins to hold it in place. It tends to reorder best alongside our sports and instant hijab ranges, for buyers going after an active, casual-first customer. Offered from 25 pieces per pattern per colour.

MOQ

HIJAB TYPE 12

Bamboo Hijabs

Bamboo-viscose blend for a soft, breathable, eco-positioned hijab range.

Model wearing a soft bamboo-viscose hijab in a muted earthy tone

Close-up of soft bamboo-blend fabric showing its smooth, breathable weave

Bamboo uses a bamboo-viscose blend, and it markets well to sustainability-conscious customers while also just genuinely feeling softer and wicking moisture better than standard cotton jersey. The fiber's natural antibacterial properties and breathability make it a good fit if you're building an eco or wellness-positioned private label range, and it takes muted, earthy dye tones particularly well. This is a newer addition to our fabric library, added because distributors kept asking for a natural-fiber option beyond cotton. Offered from 25 pieces per pattern per colour.

MOQ

Aria Chiffon Hijab

Signature matte chiffon hijab with a weighted hem for consistent drape.

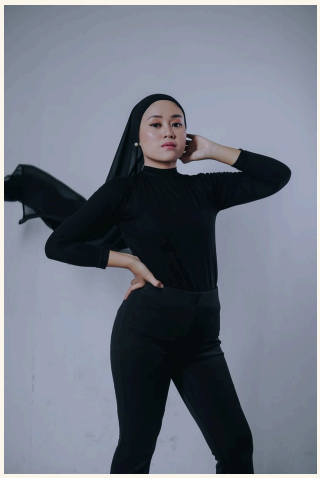

BEST SELLER | FEATURED | PRIVATE LABEL READY

Aria chiffon hijab draped on a mannequin, front view

Aria chiffon hijab fabric close-up showing matte texture

Aria chiffon hijab folded in a color range

Our best-selling chiffon hijab, the Aria went through three fabric revisions before we landed on a matte finish that photographs well under both studio and daylight conditions. A weighted rolled hem keeps the drape consistent through a full day of wear, and at 75 grams per square meter the fabric is opaque enough that most climates don't need an underscarf underneath. It comes in 42 solid shades from our standard color library, with custom Pantone matching available on request for private label orders.

Fabric weight	75 gsm
Composition	100% polyester chiffon
Finish	Matte, opaque
Hem	Weighted rolled hem

Dania Cotton Voile Hijab

Breathable cotton voile hijab for hot-climate daily wear.

PRIVATE LABEL READY

Cotton voile hijab folded flat

Cotton voile weave close-up

Woven from a fine cotton voile, Dania trades the sheen of our synthetic core range for breathability. When customers tell us chiffon feels too warm for extended daily wear, this is the style we point warm-climate buyers toward, and it takes natural and low-impact dye processes well for a sustainability-forward range.

Fabric weight	60 gsm
Composition	100% combed cotton
Care	Machine wash warm, tumble dry low
Fabric	Cotton Voile
Sizes	70x180 cm
MOQ	25 pieces per pattern per colour
Sample charge	₹3,000 flat per sample
Lead time	20–26 days after sample approval

STYLE NO. SN-H-006 · ANIMAL PRINTED

Salwa Animal Print Hijab

Leopard and animal-print chiffon hijab for fashion-forward statement ranges.

NEW ARRIVAL | PRIVATE LABEL READY

Leopard print chiffon hijab draped on a model

Salwa uses the same chiffon base as Reema, printed in leopard and other animal-print patterns instead of florals or abstract washes. We'd recommend leading a fashion-forward or trend-driven range with this one alongside a solid core — buyers consistently reorder animal print faster than seasonal florals once it's in the mix.

Fabric weight	75 gsm
Print method	In-house digital print
Care	Machine wash cold, hang dry
Fabric	Premium Chiffon
Sizes	70x180 cm, 75x190 cm

Reema Printed Chiffon Hijab

Digitally printed chiffon hijab with in-house pattern development.

NEW ARRIVAL | PRIVATE LABEL READY

Printed chiffon hijab flat lay

Chiffon print detail close-up

Same chiffon base as our best-selling Aria, but run through our in-house digital print studio instead of solid-dyed — that's Reema. Buyers can submit their own pattern or work with our design team to develop one, and strike-off samples are typically ready in under two weeks.

Sumaya Crepe Hijab

Textured crepe hijab with a heavier drape for cooler climates.

PRIVATE LABEL READY

Crepe hijab wrapped on a model

Crepe texture close-up

Sumaya uses a lighter-weight crepe than our khimar and abaya lines, cut specifically for hijab drape and hand-feel. The textured surface holds a wrap style through a full day without needing repositioning — distributors in cooler climates tell us that's their top reason for reordering it.

Fabric weight	95 gsm
Composition	100% polyester crepe

Iman Modal Hijab

Soft modal-blend hijab with a matte, low-sheen finish.

PRIVATE LABEL READY

Modal hijab draped on a mannequin

Modal fabric hand-feel close-up

Woven from a modal-cotton blend, Iman has a softer hand-feel than our polyester core range and a matte finish suited to buyers building a natural-fiber narrative. It holds color depth well across both light and dark shades in the same dye batch.

Composition	60% modal, 40% cotton
Finish	Matte, low-sheen
Care	Machine wash cold, hang dry
Fabric	Modal-Cotton Blend
Sizes	70x180 cm

02

Instant Hijabs

Pre-styled, pull-on instant hijabs with the underscarf built in, so the look is finished in under a minute with zero pinning.

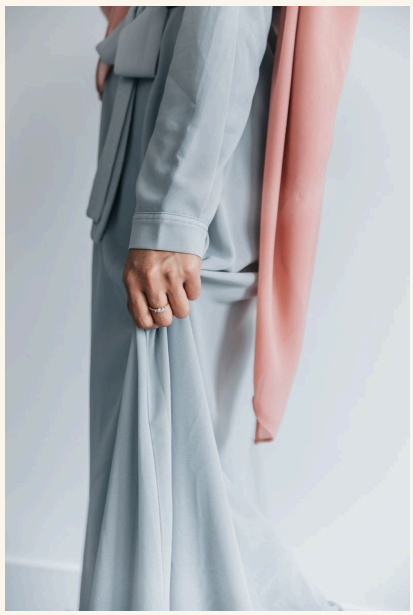

An instant hijab solves exactly one problem: speed, without the wrapped, styled look falling apart by midday. The underscarf cap is sewn straight into the outer chiffon layer and pre-shaped, so it falls the same way every single time it's put on, no pins involved.

This has consistently been one of the strongest entry points for private label ranges aimed at first-time hijab wearers, teenagers, and gifting occasions. Part of the reason is simple: a foolproof, already-styled look cuts down on the returns you'd otherwise get from customers who can't quite manage a traditional wrap on their own. It's also a category with more search demand than competition in modest wear right now, so it's a reasonable one to build a new range around rather than treat as an afterthought SKU.

Elif Printed Instant Hijab

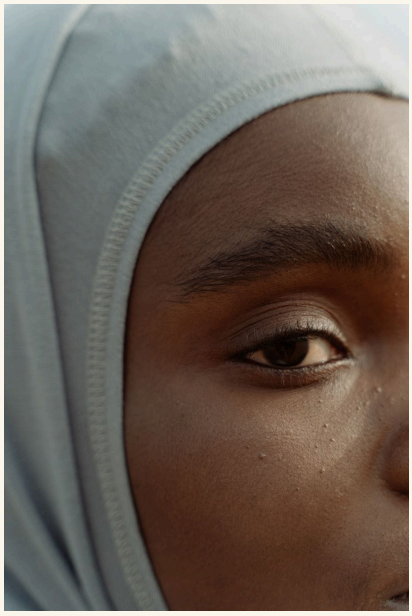

INSTANT TYPE 01

Chiffon Instant Hijab

Our classic pull-on construction on matte chiffon, sewn to a pre-shaped drape.

Model wearing a chiffon instant hijab with a pre-shaped drape

Close-up of chiffon instant hijab construction and attached underscarf

Chiffon instant hijabs are the reference style in this category: a matte chiffon outer shell with the underscarf cap sewn directly in, pre-shaped so the drape falls the same way every time, no pins or practice needed. Chiffon holds a crisper, more structured fold than jersey-based instant styles, which is why most private label ranges lead with this version for a polished, retail-ready first impression. It's also the easiest base fabric to print and recolor consistently at volume if you're building a wider instant hijab range. Offered from 25 pieces per pattern per colour.

INSTANT TYPE 02

Jersey Instant Hijab

Stretch jersey base for a softer, more casual pull-on than the chiffon standard.

Model wearing a jersey instant hijab in a relaxed, casual style

Close-up of stretch jersey instant hijab fabric and construction

Jersey instant hijabs swap the chiffon shell for a stretch jersey knit, trading chiffon's crisp structure for a softer, more casual finish that suits everyday and athleisure-adjacent ranges better. The stretch also makes it easier to pull on and adjust than a woven fabric, which buyers targeting younger or first-time hijab wearers tend to prefer. It reorders strongest alongside our jersey and modal hijab lines for anyone building a coordinated casual program. Offered from 25 pieces per pattern per colour.

INSTANT TYPE 03

Pre-Stitched Hijab

Fully pre-sewn shape with no folding or draping required at the point of wear.

Model wearing a fully pre-stitched hijab with no draping required

Close-up of pre-stitched hijab construction showing built-in pleating

Pre-stitched hijabs take the instant idea as far as it goes: the entire outer shape, pleating, and fall are stitched in at the factory, so there's no folding, tucking, or draping technique for the customer to get right at all. We recommend this for gifting and first-time-buyer SKUs specifically because it removes user error from the equation entirely. Construction is more labor-intensive than a simple pull-on tube, so there's a moderate cost increase over our standard chiffon instant line. Offered from 25 pieces per pattern per colour.

INSTANT TYPE 04

Modal Instant Hijab

Soft modal-blend shell for a natural-fiber instant hijab with a matte, low-sheen finish.

Model wearing a soft modal instant hijab with a matte finish

Close-up of modal instant hijab fabric and attached cap construction

Modal instant hijabs use our modal-cotton blend in place of chiffon, for buyers who want a natural-fiber story even within the fast-fashion instant hijab category. The modal shell holds its shape well through the attached-cap construction without needing the fabric to carry structure on its own, and it feels noticeably softer against the skin than chiffon over a full day. It's a good step-up SKU if you're building a good-better-best instant hijab range. Offered from 25 pieces per pattern per colour.

INSTANT TYPE 05

Crinkle Instant Hijab

Self-textured crinkle finish for volume and movement in a pull-on construction.

Model wearing a crinkle-texture instant hijab with visible movement

Close-up of crinkle instant hijab fabric showing its textured surface

Crinkle instant hijabs bring our heat-set crinkle texturing into the pull-on category, giving visible volume and movement without asking the customer to style or crease the fabric themselves. Since the texture is permanent rather than pressed, it survives machine washing without needing to be re-ironed between wears, the same durability edge our standalone crinkle hijab has over pleated alternatives. It's a good step-up finish for buyers who find flat chiffon instant styles too plain for their retail price point. Offered from 25 pieces per pattern per colour.

INSTANT TYPE 06

Cotton Instant Hijab

Breathable cotton shell for hot-climate daily wear in a no-pin construction.

Model wearing a breathable cotton instant hijab

Close-up of cotton instant hijab fabric and construction

Cotton instant hijabs pair a breathable cotton-voile shell with the category's standard attached-underscarf construction, for buyers in hot, humid markets whose customers want natural fiber but still expect the speed of a pull-on style. It trades chiffon's crisp structure for better airflow and a softer, less synthetic feel, at the cost of a slightly less sharp fold after packaging. It's a natural pairing for buyers who already stock our cotton voile hijab and want a matching instant option. Offered from 25 pieces per pattern per colour.

INSTANT TYPE 07

Pleated Instant Hijab

Pressed pleat construction for a structured, uniform fold across every unit.

Model wearing a pleated instant hijab with a structured, tailored fold

Close-up of pressed pleat detail on an instant hijab

Pleated instant hijabs use a pressed, uniform pleat set into the fabric during finishing, giving a structured, tailored look quite different from crinkle's random self-texture. Because the pleat is heat-pressed rather than woven in, it will soften gradually over repeated washing, and we tell buyers that upfront rather than overselling the finish as permanent. It works well for occasion and formalwear-adjacent private label ranges that want a tailored instant option. Offered from 25 pieces per pattern per colour.

INSTANT TYPE 08

One-Piece Instant Hijab

Single-piece pull-on construction — the simplest, fastest style in the category.

Model wearing a simple one-piece pull-on instant hijab

Close-up of one-piece instant hijab construction

One-piece instant hijabs are the simplest version in this category: a single pull-on garment with the underscarf built in, no detachable layers or separate components to lose or mismatch. It's the lowest-cost, fastest-to-wear construction we make, and what we'd recommend leading with for a brand-new instant hijab range before adding two-piece or layered variations. You can specify chiffon, jersey, or modal within this same one-piece construction. Offered from 25 pieces per pattern per colour.

INSTANT TYPE 09

Two-Layer Instant Hijab

Double-fabric-layer construction for added opacity and dimension over a single shell.

Model wearing a two-layer instant hijab with added opacity and fall

Close-up of two-layer instant hijab construction showing the double fabric

Two-layer instant hijabs add a second fabric layer beneath the outer shell, giving added opacity for lighter-colored or sheerer fabrics and a subtle dimensional fall that a single layer can't produce on its own. We recommend this specifically for pastel and light-colorway orders, where a single chiffon layer alone can run too sheer for some markets' coverage expectations. If you want a detachable variation on this layered approach, take a look at our Shifa Two-Piece Instant Hijab. Offered from 25 pieces per pattern per colour.

INSTANT TYPE 10

Instant Khimar Hijab

Instant pull-on convenience extended to khimar-length shoulder and chest coverage.

Model wearing an instant khimar hijab with extended shoulder coverage

Close-up of instant khimar hijab construction and fabric fall

Instant khimar hijabs extend the category's pull-on, no-pin convenience down to khimar-length coverage across the shoulders and chest, for customers who want fuller coverage without giving up the speed that makes instant styles popular in the first place. It's a good crossover SKU if you're stocking both categories and want one style that bridges instant hijabs and our khimar range rather than treating them as separate customer segments. Construction and fabric options mirror our standard instant hijab line, just scaled to the longer khimar body. Offered from 25 pieces per pattern per colour.

Amira Instant Hijab

Pull-on instant hijab with attached underscarf, no pins required.

BEST SELLER | PRIVATE LABEL READY

Instant hijab with attached underscarf on a model

Instant hijab pull-on construction detail

Speed without sacrificing finish is the whole point of Amira. The attached underscarf cap sits securely under the outer chiffon layer, and the pre-shaped drape gets customers a styled look in under a minute. It's a strong entry-level SKU for private label ranges targeting first-time hijab wearers and gifting occasions.

Shifa Two-Piece Instant Hijab

Detachable two-piece instant hijab with interchangeable outer layers.

PRIVATE LABEL READY

Two-piece instant hijab set

Instant hijab cap and outer layer detail

Shifa separates the underscarf cap from the outer layer entirely and sells as a coordinating set, so customers — and retailers — can mix and match outer colors against a smaller set of cap colors. That also cuts down the SKU count a retailer needs to stock a full color range.

Construction	Detachable two-piece

Meryem Modal Instant Hijab

Soft modal-blend instant hijab with a matte natural-fiber finish.

PRIVATE LABEL READY

Modal instant hijab on a model

Instant hijab modal fabric detail

Meryem swaps in our modal-cotton blend for chiffon, for buyers who want a natural-fiber narrative even within the fast-fashion instant hijab category. It holds shape well through the attached-cap construction, so the shell fabric isn't carrying the structure on its own.

Construction	Attached underscarf, pull-on
Composition	60% modal, 40% cotton

03
Sports & Swim Hijabs

Moisture-wicking, four-way stretch sports hijabs in a genuine technical knit, built for performance wear, swimming, and active use.

A sports hijab isn't just a jersey hijab with a sportier label. It's built on a different technical knit, one developed specifically for moisture management and stretch recovery through repeated wear, sweat, and washing, with flatlock seams so it doesn't chafe during activity. Reusing standard jersey and calling it an "active" line is a shortcut, and it shows up fast in the form of pilling and stretched-out necklines after a handful of wash cycles.

Our sports hijab fabric is tested specifically for quick-dry performance, and it's the reference style we use for activewear and swim-adjacent private label programs. Search demand for this category tends to run higher than most buyers expect, mostly because so few manufacturers actually make a genuinely technical version instead of just relabeling an everyday hijab. That's worth knowing before you commit a range to generic fabric.

Sports Hijabs

Our reference technical-knit hijab, tested for moisture management and stretch recovery.

Model wearing a technical sports hijab during activity

Close-up of technical sports hijab fabric and flatlock seams

This is built on a technical knit developed specifically for moisture management and stretch recovery through repeated wear, sweat, and washing, with flatlock seams to prevent chafing during activity. It's not just a jersey hijab with a sportier label. Reusing standard jersey for an "active" line is a shortcut, and it shows up fast in customer complaints about pilling and stretched-out necklines after a few wash cycles. This is the reference style underneath every other activewear piece in this category. Offered from 25 pieces per pattern per colour.

Running Hijabs

Lightweight running hijab with mesh ventilation panels for high-output cardio.

Model wearing a running hijab with mesh ventilation panels

Close-up of mesh ventilation panel detail on a running hijab

Running hijabs add mesh ventilation panels at the temples and nape to our sports hijab construction, built specifically for running and high-output cardio where heat buildup is the main complaint with standard sports hijabs. It's lighter overall than our general sports hijab, which makes it the better choice for customers who train outdoors or run distance rather than mixed gym training. Offered from 25 pieces per pattern per colour.

Gym Hijabs

Firmer-compression sports hijab built for high-intensity strength and interval training.

Model wearing a firm-compression gym hijab during strength training

Close-up of compression knit fabric used for gym hijabs

Gym hijabs use a firmer compression knit than our standard sports hijab, built for high-intensity training where a snugger fit keeps things from shifting during strength and interval work. This is the style our distributors in competitive athletic-wear channels reorder most consistently, since it holds position through movement that would shift a looser hijab. Offered from 25 pieces per pattern per colour.

Swimming Hijabs

Chlorine- and salt-resistant swim hijab with a snug, secure fit in water.

Model wearing a chlorine-resistant swimming hijab

Close-up of technical swim knit fabric used for swimming hijabs

Swimming hijabs are built on a chlorine- and salt-resistant technical knit with a snug fit designed to stay in place in water, extending our sports hijab program into swimwear. It pairs with our modest swimwear-adjacent development program for buyers building a full aquatics range. Standard fabric just doesn't hold up to chlorine exposure the way this dedicated swim knit does, which is worth knowing if you're tempted to repurpose a standard sports hijab for pool use. Offered from 25 pieces per pattern per colour.

Luxury Silk Hijabs

Mulberry silk and satin hijabs with hand-rolled hems and branded gift packaging, built for boutique and department store placement, not volume racks.

Our luxury tier is 100% mulberry silk with a hand-rolled hem, done by a specialist stitching team rather than a machine. That's really the detail that tells a genuine silk hijab apart from a "silk-feel" one at the point of sale. Every piece gets inspected individually and packed into a branded rigid gift box before it ships, because at this price point, people are buying the unboxing almost as much as the fabric.

Margins are better here than on standard chiffon or jersey, and competition is thinner, which is why we'd point boutique buyers toward this category specifically. The MOQ is lower than on our volume lines too — 25 pieces per pattern per colour — because it's built for curated retail, not bulk distribution. Custom gift box branding and either hand-rolled or machine-hemmed finishing are both available if you're ordering private label.

STYLE NO. SN-LH-028 · CASHMERE BLEND

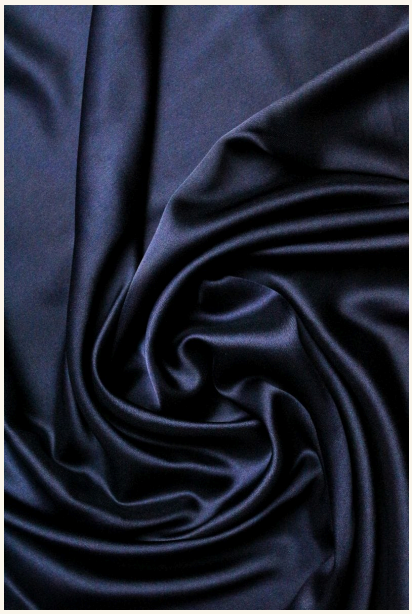

Zumurrud Cashmere-Blend Hijab

Silk-cashmere blend hijab for cooler-climate luxury ranges.

PRIVATE LABEL READY

Cashmere-blend hijab draped on a model

Cashmere-silk blend hand-feel detail

Zumurrud blends a small percentage of cashmere into our silk base for added warmth and a softer hand-feel, suited to cooler-climate luxury ranges. Buyers serving European and North American winter collections tend to stock it as a seasonal complement to our lighter pure-silk styles.

Composition	85% silk, 15% cashmere
Season	Cooler-climate luxury range
Care	Dry clean only
Fabric	Silk-Cashmere Blend
Sizes	90x90 cm
MOQ	25 pieces per pattern per colour
Sample charge	₹3,000 flat per sample

Lulu Pearl-Trim Silk Hijab

Silk hijab finished with a delicate pearl-bead edge trim.

PRIVATE LABEL READY

Pearl-trim silk hijab draped elegantly

Pearl bead trim detail close-up

Lulu finishes our mulberry silk base with a fine pearl-bead trim along the edge — softer and more understated than Johara's crystal trim, and aimed at bridal and gifting ranges that want subtlety over sparkle.

Composition	100% mulberry silk
Embellishment	Hand-applied pearl-bead trim
Care	Dry clean only
Fabric	Mulberry Silk
Sizes	90x90 cm

Marjan Ombré Silk Hijab

Hand-dip-dyed ombré silk hijab for a distinctive gradient finish.

PRIVATE LABEL READY

Ombre silk hijab draped on a model

Ombre gradient dye detail

Marjan uses a hand-dip-dye process to create a gradient ombré effect across the silk panel. It's a distinctive finish that's genuinely hard to replicate with standard dye-lot processes, which makes it a real differentiator for boutique private label ranges.

Composition	100% mulberry silk
Dye process	Hand dip-dye ombré
Care	Dry clean only
Fabric	Mulberry Silk

05
Bridal Hijabs

Occasion-grade hijabs with pearl, crystal, stone, and hand-embroidered embellishment, made for wedding, nikah, and bridal party ranges.

Bridal hijab is a genuinely different manufacturing discipline from our standard hijab lines, not just a dressier colorway of the same fabric. Pearls, crystals, stones, embroidery, whatever the embellishment is, it has to be placed or stitched by hand without distorting the drape underneath. That's why every bridal piece goes through a specialist finishing team instead of the standard line.

We build this range on silk and satin bases because they can carry the weight of embellishment without sagging or puckering the way a lighter chiffon would. Buyers tend to use this category for boutique, bridal party, and gifting channels alongside their regular hijab range — lower volume, better margin, more of a complement than a core line. Small-batch production is the norm here, and most styles are available from 25 pieces per pattern per colour.

BRIDAL STYLE 01

Bridal Lace Hijab

Delicate lace trim or lace overlay panel for a soft, romantic bridal finish.

Model wearing a bridal hijab with delicate lace trim detail

Close-up of lace overlay panel on a bridal hijab

Bridal lace hijabs pair a silk or satin base with either a lace trim edge or a sheer lace overlay panel, giving a softer, more romantic finish than our fully embellished crystal or stone styles. We finish the lace flat and pre-wash it to avoid a shrinkage mismatch against the base fabric — that's the defect that shows up as visible puckering along the trim line on lower-cost competitors' pieces. Most bridal party buyers order this one for bridesmaids' hijabs, then pick something more heavily embellished for the bride herself. Produced from 25 pieces per pattern per colour.

BRIDAL STYLE 02

Pearl-Embellished Hijab

Hand-placed pearl trim along the edge or in a scattered field across the fabric.

Model wearing a bridal hijab draped in cascading pearl bead chains

Close-up of hand-sewn pearl beading on bridal hijab fabric

Pearl-embellished bridal hijabs use hand-sewn faux-pearl beading, either as a continuous trim along the hem or scattered across the fabric, with each bead individually secured so it doesn't shed with handling the way glued alternatives do. It's our most-ordered bridal finish, mostly because it reads as elevated without the cost or weight of full crystal coverage. Bead density and placement pattern can be fully customized per design. Produced from 25 pieces per pattern per colour.

BRIDAL STYLE 03

Crystal Hijab

Faceted crystal embellishment for maximum sparkle under event lighting.

Model wearing a blush bridal niqab with faceted crystal trim catching the light

Crystal hijabs use faceted glass or acrylic crystals, hand-set through a hot-fix or hand-stitched application chosen specifically for how they catch light under event and reception lighting, not just in daylight photography. Coverage can run anywhere from an accent trim to a fully crystal-covered surface, priced accordingly. Since this is our heaviest embellishment style, we only build it on a structured silk or satin base sturdy enough to carry the weight without drooping. Produced from 25 pieces per pattern per colour.

BRIDAL STYLE 04

Stone-Studded Hijab

Mixed stone-work embellishment combining beads, sequins, and crystals in one design.

Model wearing a stone-studded bridal hijab with mixed embellishment

Close-up of mixed bead, sequin, and crystal stonework on bridal hijab fabric

Stone-studded bridal hijabs combine multiple embellishment types — beads, sequins, and crystals — into one mixed-media design instead of a single repeated element, which gives a more layered, textured finish than a single-material style can. Our design team tends to recommend this when a buyer sends over a reference image that combines several embellishment styles they've seen separately elsewhere. Mixing application methods does push the lead time slightly longer than single-technique styles. Produced from 25 pieces per pattern per colour.

BRIDAL STYLE 05

Embroidered Bridal Hijab

Hand or machine thread embroidery in a custom motif for a signature bridal design.

Model wearing an embroidered bridal hijab with a custom thread motif

Embroidered bridal hijabs carry a thread-embroidered motif rather than applied beading or crystal, which gives a couture-adjacent read and can be fully customized to a buyer's own pattern or a motif we develop in-house. Thread color, density, and placement are all specified per order, and we can also combine embroidery with a light pearl or crystal accent on request. More often than not, this finish gets ordered as a fully custom, one-off design rather than a repeat catalog SKU. Produced from 25 pieces per pattern per colour.

BRIDAL STYLE 06

Satin Bridal Hijab

High-sheen satin base for a fluid, photograph-ready drape under embellishment.

Model wearing a satin bridal hijab with a fluid, photograph-ready drape

Close-up of glossy satin fabric used as a bridal hijab base

Satin bridal hijabs use our high-sheen satin weave as a base, specifically because its weighted drape holds embellishment in place through a full day of ceremony, reception, and photography without shifting. The glossy finish also reflects light well under both daylight and flash, which buyers tell us makes a real difference in how a style shows up in a bride's wedding photos. You can order it plain or as the base for any of our pearl, crystal, or embroidery finishes. Produced from 25 pieces per pattern per colour.

BRIDAL STYLE 07

Silk Bridal Hijab

Genuine mulberry silk base with a hand-rolled hem for the highest bridal tier.

Model wearing a mulberry silk bridal hijab with a hand-rolled hem

Close-up of silk bridal hijab fabric showing its natural sheen

Silk bridal hijabs run on the same genuine mulberry silk as our luxury hijab line, finished with a hand-rolled hem instead of a machine one — our top bridal tier, for buyers whose customers specifically ask for real silk over a synthetic satin-look alternative. The natural fiber's sheen and weight give it a drape that photographs and moves differently from satin, and some brides ask for it by name once they've felt both side by side. Every piece gets inspected individually before packaging. Produced from 25 pieces per pattern per colour.

BRIDAL STYLE 08

Shimmer Bridal Hijab

Fine metallic-thread weave for a subtle overall shimmer rather than applied embellishment.

Model wearing a shimmer bridal hijab with subtle all-over metallic sparkle

Close-up of fine metallic thread woven through shimmer bridal hijab fabric

Shimmer bridal hijabs weave a fine metallic thread through the base fabric itself, for an all-over subtle sparkle rather than the localized sparkle you'd get from applied crystals or beads. It's a lower-cost route to a bridal-appropriate finish for buyers who want event-ready shine without the labor cost of hand-applied embellishment, and it also works well as a base fabric if you want to add a light pearl or crystal accent on top. Since the metallic thread is woven rather than printed, the shimmer won't crack or flake with wear. Produced from 25 pieces per pattern per colour.

BRIDAL STYLE 09

Crown-Style Bridal Hijab

Structured under-cap and drape built to sit cleanly beneath a bridal tiara or crown.

Model wearing a crown-style bridal hijab styled beneath a tiara

Close-up of structured under-cap construction for a crown-style bridal hijab

Crown-style bridal hijabs are drafted with a structured under-cap and a drape line engineered specifically to sit cleanly beneath a tiara, crown, or hijab-specific headpiece, without the fabric bunching or shifting the accessory out of place through the ceremony. Most standard hijabs aren't drafted with this in mind, since the pattern has to account for headpiece pins and a flatter crown profile. Buyers typically order this alongside a matching bridal accessory line. Produced from 25 pieces per pattern per colour.

BRIDAL STYLE 10

Veil-Style Bridal Hijab

Extended sheer overlay styled to fall like a traditional veil over the base hijab.

Model wearing a veil-style bridal hijab with a sheer overlay

Close-up of sheer veil overlay fabric hemmed for a bridal hijab

Veil-style bridal hijabs add an extended sheer overlay layer, cut and hemmed to fall like a traditional wedding veil over a base hijab rather than working as a single-layer garment. Buyers can style the overlay forward over the face for the ceremony, then sweep it back for the reception, so one piece covers two distinct looks across the event. Most often it's ordered paired with one of our embellished bridal hijabs as the base layer underneath. Produced from 25 pieces per pattern per colour.

Standard export packing

- Each hijab folded and individually poly-bagged
- Inner packs of 10 or 12 pieces per colour
- 5-ply export cartons, about 200 – 300 chiffon hijabs or 150 – 200 jersey hijabs per carton
- Cartons marked with style, colour, size, quantity and PO number
- Luxury and bridal pieces packed in individual rigid gift boxes

Colour library

Every core hijab ships in our 42-shade standard library. Custom Pantone matching is available on request.

Private label & ordering

Private label / OEM / ODM

- Custom woven or printed labels, care and size labels
- Hang tags, poly bags, retail cards and rigid gift boxes
- Custom Pantone colours on existing fabric bases (lab-dip charges apply)
- Custom fabric development (new weights, blends or finishes) from about 1,000 – 3,000 metres
- OEM manufactures to your specification. ODM adds design development from a sketch, reference image or sample garment.
- No tech pack needed to start. Our team builds it with you during sampling.

Order terms

MOQ (all hijab styles)	25 pieces per pattern per colour
Sample charges	₹3,000 flat per sample

From enquiry to shipment

1. **Enquiry**
   Send target styles, quantities, colours and market through samnoor.in, email or WhatsApp.
2. **Quotation**
   Written quotation within one business day, with MOQ, price, lead time and sampling policy.
3. **Sampling**
   Pre-production sample or lab-dip in 7 – 12 business days. Sample charges: ₹3,000 flat per sample.
4. **Approval & PO**
   Sample sign-off, purchase order and deposit confirm your production slot.
5. **Production**
   18 – 30 days for standard styles. 30 – 45 days for custom fabric, embellishment or a first private-label setup.
6. **QC & dispatch**
   In-line, pre-final and final audits, then export documents and shipment on your Incoterm.
